

REGULATED AIR CARGO AGENT PRE-AUDIT CHECK AND EXPOSITION DEVELOPMENT

Dangerous Goods Management (DGM) offers a practical and comprehensive consultancy service for Regulated Air Cargo Agents (RACA) who wish to ensure their facilities and staff comply with Civil Aviation Authority (CAA) Rule Part 109. This may be done prior to a scheduled CAA audit, or as part of your routine Quality Assurance programme. The team at DGM has the training and experience to offer a range of consultancy services ensuring total compliance.

Audits can identify potential issues before they cause delays and can be tailored to the individual RACA's needs. They may include:

- Analysis of existing Exposition
- Responsibilities of the RACA & staff
- Facility Requirements
- Screening options and procedures for Known and Unknown Customers
- Tamper Evident Controls
- Declarations and Documentation
- Record-keeping and reporting
- Training records and recommendations
- Internal Quality Assurance

We can also develop an Exposition for companies wishing to establish themselves as a RACA.

Service: Formal audit report can be provided, informal feedback will be provided during consultancy

Cost: Hourly rate \$ (1 hour minimum) + travel

If you would like more information, or would like to register, please email training@dgm.co.nz

DGM is a CAA-Approved Part 141 Training Organisation and is accredited by the IATA Training and Development Institute
